Weather Traffic	Robotic Legs Could Produce Super Troops
SUBSCRIBE >	MICHELLE LOCKE
The Miami Herald	Associated Press
THE OWNER AND ADDRESS OF	
Make us your homepage	BERKELEY, Calif Move over Bionic Man and make room for BLEEX - the Berkeley Lower Extremities
5 minuteherald	Exoskeleton, with strap-on robotic legs designed to turn an ordinary human into a super strider.
Sections	
News	Ultimately intended to help people like soldiers or firefighters carry heavy loads for long distances, these
Breaking News	boots are made for marching.
Miami-Dade	
Neighbors Broward	"T' I i for the strength later really benefits from hymon intellect and the strength of the machine " says
Broward Hometown	"The design of this exoskeleton really benefits from human intellect and the strength of the machine," says
Florida Keys	Homayoon Kazerooni, who directs the Robotics and Human Engineering Laboratory at the University of
Florida	California-Berkeley.
Nation	
• World	The exoskeleton consists of a pair of mechanical metal leg braces that include a power unit and a backpack-
Americas	like frame. The braces are attached to a modified pair of Army boots and are also connected, although less
• Cuba	rigidly, to the user's legs.
Haiti Canada	
Canada Politics	the standard budged is machanism function like a human narvous system, constantly
Education	More than 40 sensors and hydraulic mechanisms function like a human nervous system, constantly
Issues & Ideas	calculating how to distribute the weight being borne and create a minimal load for the wearer.
Weird News	
Sports	"There is no joystick, no keyboard, no push button to drive the device," says Kazerooni, a professor of
Business	mechanical engineering. "The pilot becomes an integral part of the exoskeleton."
Entertainment	
Tropical Life	In lab experiments, says Kazerooni, testers have walked around in the 100-pound exoskeleton plus a 70-
Health	pound backpack and felt as if they were carrying just five pounds.
Home & Garden Travel	pound backpack and rent as in they were can ying just nive pounds.
Opinion	
Columnists	Eventually, the device could help rescuers haul heavy equipment up high-rise buildings or turn tired troops
Corrections	into striding super soldiers.
City Guide	
Find it Fast	What it won't do is turn you into a Borg, the gadget-happy gladiators of "Star Trek" fame.
Calendar	
Dave Barry	"The exoskeleton is not going to magically transform people into killing machines," says Kazerooni, known
Dolphins	to his students as Professor Kaz. "They're really good, it turns out, at enabling firefighters, soldiers, post-

	"There's just too much to do," says Mason. "Every time that there is an advance in computing, there are
	just so many more things that it becomes possible to do. Robotics is really about interfacing computers to
	the physical world so that their sensors give them a better concept of what's going on around them - they
	can make interesting things happen instead of just sitting there in their little beige boxes."
	Kazerooni isn't offering test drives of the exoskeleton. But if he were, Mason would be interested.
	"It looks really exciting," says Mason. "I'd like to try it on myself."
	The locks really exerting, says mason. I a like to try it on myself.
